

Service Inventory Blueprint

Project Name		Artifact Number	(links to SCM, governance)
IT Project Manager		Version	(links to SCM, governance)
Business Project Mgr		Date	

Candidate Service List			
Name	Service Layer	In Scope/Priority	Short Summary
Address	Entity	Yes	General purpose service with a collection of operations related to all types of addresses
Company	Entity	Yes	Service with operations and data related to all aspects of all companies that we do business with
Contact	Entity	No	Service that provides operations to add, find, retrieve, update, and remove contacts in all contexts in which we operate
Data integrity	Utility	Yes	Service to automate detection and correction of key data across multiple entities
Document	Entity	Yes	Service in support of essential collateral utilized in all areas of operations. Note that an Agreement is a special class of Document. A Document may contain many files, or it may contain none.
File	Utility	Yes	Service to provide cross-functional file-related capabilities. Each file will be linked to one parent Document.
